**A TRUSTED NAME IN
CABLE MANAGEMENT AND
PROTECTION**

Atkore Australian Head Office located in Minto, NSW

LEADING SOLUTIONS IN CABLE MANAGEMENT AND PROTECTION

When it comes to cable management and protection in the United States, Atkore is a household name.

Headquartered in Illinois, Atkore designs and manufactures a variety of products, including strut channels, metal framings, cable trays, conduits and cable clamps.

Alongside global companies Unistrut and Flexicon, which are well-established brands in Australia and New Zealand, Atkore is poised to become a major player in the market.

Atkore New Zealand Sales Office located in Christchurch, NZ

Atkore Australia Head Office and Warehouse located in Minto, NSW

Your complete cable management and protection provider

With their impressive catalogue of struts, cable trays, cable ladders and cable baskets that come in an array of finishes, from stainless steel to hot dip galvanised through to metallic and non-metallic flexible conduits and fittings, Atkore is a one-stop shop for a wide variety of industries and applications.

Experts in cable management
& metal framing

Unistrut

Unistrut is the undisputed expert in metal framing and struts. Not only did Unistrut create the metal framing system used today, the company has been designing and manufacturing products in Australia for over 50 years.

Experts in flexible
conduit systems

Flexicon

Flexicon is a market leader in flexible conduit cable protection systems. The company has a well-earned reputation for quality and performance. Flexicon has been supplying and supporting the Australian and New Zealand market since its establishment.

The Atkore way of doing business is built on key values:

Accountability

Teamwork

Integrity

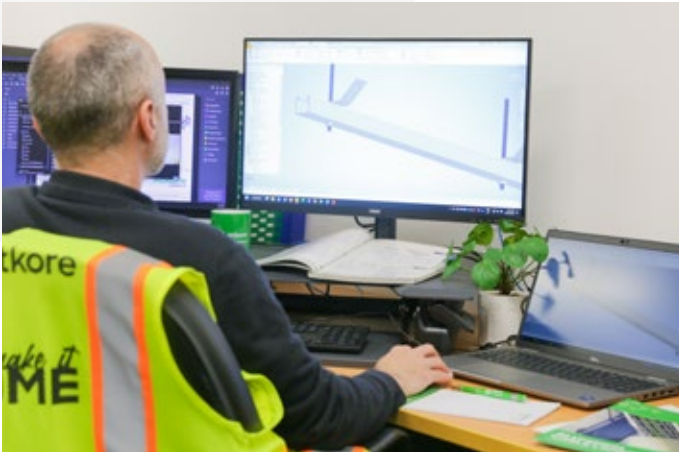

Respect

Excellence

These are the values that underpin our product quality and service to our customers. For all your cable management and protection requirements, look no further than Atkore - Unistrut & Flexicon.

Our commitment to quality is what gives us a trusted name in the cable management and protection industry, and it has helped us grow into the successful global enterprise we are today.

Innovation

To keep up with evolving market needs, Atkore is always on the lookout for ways to improve their products and services. That's why they have a team of engineers dedicated to finding ways to extend the rated life of Atkore products and decrease the lead time from manufacturing to delivery.

In addition to their standard products, Atkore also works closely with customers to develop customised products that meet their specific needs.

Engineering excellence

Atkore products are put through a rigorous quality assurance process to ensure they'll stand up to the extreme conditions of industries such as oil and gas, mining and railways.

Atkore serves a variety of markets, including data centres, renewables and infrastructure.
